**Pump Sets for Heating Utility** 27/07/2010

MZT Pumpi Skopje has successfully produced five pump sets for transport of hot water for the heating utility company "Beogradske Elektrane". The pump sets will be installed in the city's heating system in order to improve the transport of hot water to individual homes in Belgrade - Serbia.

The pumps are horizontal single stage centrifugal pumps - type S10CP25, with the following characteristics: Q=65-111 m3/h, H=82-74 m, and motor P=55 kW n=2900 rpm.
